DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-16, 17-18 and 25-29 drawn to a measuring and layout device including a method of measuring, classified in class 33, subclass 32.1.

II. Claims 19-24, drawn to a method of accurately cutting sheet goods, such as for cutting a carpet for room floor, classified in class 33, subclass 562.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to practice another and materially different process such as a process for marking a line without cutting.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Dan Girdwood on Monday July 9, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Maria Fernandez whose telephone number is 703-305-1522. The examiner can normally be reached on 8:00- 5:00, Monday-Friday.
